DETAILED ACTION

Claims

1. Claims 1-7 are pending.

Request for Clean Copy of Claims

2. Please send in a clean copy of all pending claims with the next response.

Objection Withdrawn

3. The objection to the abstract, stated in section 2 of the 13 May 2003 office action (Paper No. 8), is withdrawn in view of the amendment to the abstract in the response dated 03 July 2003 (Paper No. 9).

Rejection Withdrawn

4. The 35 USC 112 rejection of claims 1-7 as indefinite, recited in section 4 of Paper No. 8, is withdrawn in view of the amendments to claims 1 and 5 in Paper No. 9.

New Rejections

Statutory Double Patenting

5. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Art Unit: 1772

6. Claims 1, 2, and 4 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1, 2 and 4 of prior U.S. Patent No. 6,593,280 (to Matsunaga et al). This is a double patenting rejection.

The substance of claims 1, 2 and 4 of this application is identical to that of claims 1, 2 and 4 of the '280 patent. The examiner deems the new preamble to merely a statement of intended use, which does not distinguish the coatings of these claims from those already patented in the '280 patent claims.

Nonstatutory Double Patenting

7. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

8. Claims 3 and 5-7 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-9 of U.S. Patent No. 6,593,280. Although the conflicting claims are not identical, they are not patentably distinct from each other because:

Art Unit: 1772

a. the properties recited in claims 3, 6, and 7 are expected/latent properties of the coatings claimed in the '290 patent; and

b. the method of filling joint spaces recited in claim 5 is merely coating walls, piles or pipes with the coatings of the '280 patent (Compare claim 4 of the patent.).
